ABOUT ME

I enjoy working on challenging projects with creative people, pursuing clean code and mature software architecture. In the last years I am focusing mainly on the backend, designing and building distributed, microservices oriented systems.

SKILLS

Programming

- .NET Core, Web API, C#, RabbitMQ, Git, CI/CD, SQL Server, MongoDB, TimescaleDB, K8S, Microservice, BPMN, Typescript, React

Viktor Borza

.Net Developer / Software architect

EXPERIENCE

Chief Software Engineer

Jun 2018 - Now

Signals Network

Prague | Remote

Contract

Designing and building a platform for professional traders, where they can create and securely deploy their trading algorithms in a cloud-based environment, using our own framework based in C#. Leading the development team, conducting technical interviews, helping executives to align technology with product vision and to meet requirements for performance, security, code quality, and scalability of the product. Read more about how I designed the platform on my [blog](#).

Senior .Net Developer

April 2016 - Now

RWS Moravia

Brno | Remote

Contract

Building core business products, as well as real-time data integration services and connectors for systems from some of the biggest software companies from Fortune 1000, which are RWS clients. I also focused on internal tools and business process automation, helping to boost the productivity of the development department. This includes the development of internal services and libraries for in-house teams, together with providing them with software tools and best practices for clean and manageable code, microservice oriented architecture, BPMN modeling, real-time monitoring and long-running workflows.

Lead .Net Developer

Feb 2017 - Oct 2017

Elekos

Nitra | Remote

Freelance

Worked as a lead developer for Elekos company, where I designed and created a web-based information system to automate their business processes. Before this solution, the company barely handled 300 customers, after we released the system, the company is easily processing more than 500 customers, spending only a fraction of the time for the operations.

.Net Developer

Feb 2014 - Dec 2015

FNZ

Brno

Full-time

Building complex financial systems supporting real-time investment transactions, used by financial advisers and investors. The job required close collaboration with the business analyst team from the UK and my assistance in the preparation of the software requirements specification documents.

EDUCATION

Master's degree

Feb 2014 - March 2016

Faculty of Informatics, Masaryk University

Service Science, Management, and Engineering

Graduated with Honors, Dean's award for best master students

Bachelor's degree

Sep 2010 - June 2013

Faculty of Informatics, Masaryk University

Applied informatics

Graduated with Honors, Dean's award for best bachelor students
